Making the invisible visible for total reassurance SenseIQ wearable-free sleep and breathing tracking

Meet the Philips Avent Premium Connected Monitor. Instantly see your baby's sleep status and breathing rate with SenseIQ; keep an eye on your baby on the 5" Parent Unit or Baby Monitor+ app, and interpret cues with cry translation.

Understand your baby's needs

- Wearable-free sleep and breathing tracking
- Helps you interpret your baby's cries
- Understand your baby's sleep schedule

Peace of mind, night and day

- Protects your family's privacy
- Speak and listen to your baby at the same time
- See every wiggle, hear every giggle
- Ultra-clear vision, day and night, with or without Wi-Fi
- Create the ideal atmosphere for sleep
- Monitor safely from the cot or the wall
- Monitor without recharging for up to 12 hours***
- Comfort with lullabies, white noise and soothing tracks

Always connected to your baby

- Monitor and feel reassured from anywhere

Highlights

Wearable-free sleep and breathing tracking

Instantly see your baby's sleep status and breathing rate without the need for an extra accessory. Our wearable-free tracking technology analyses millions of pixels per second to spot even the tiniest of motions. It then translates data into sleep status and breathing rate updates. More reassurance for you and more comfort for your baby.

Parent unit with 5" HD screen

Our Parent Unit with 5" HD screen helps you keep an eye on your little one at home and go about your day. Move easily between indoors and outdoors thanks to a generous 400 m range* and a stable connection that works with or without Wi-Fi. See clear video day and night and real-time sleep status updates. Everything you need to rest easy.

Secure Connect System

Know that your connection is completely private thanks to our Secure Connect System. It uses multiple encrypted links between the Baby Unit, Parent Unit and app, so all of the data and imagery are protected.

Cry detection and translation

Want to know if your baby is tired, gassy, hungry, uncomfortable or irritated? Our monitor detects and translates cries using a scientifically proven algorithm. You'll receive free in-app access for the first 3 months**, which means there's extra help on hand during the rollercoaster newborn stage.

Baby Monitor+ app

At home or away, our Baby Monitor+ app is an instant connection to your baby's bedroom and a window into their wellbeing. Watch them on HD video, check their sleep status and breathing rate, and get help interpreting cries.

Full HD camera Baby unit

Enjoy an ultra-clear view of your baby day and night thanks to the full HD camera on our Baby Unit with night vision. Whether you're at work or thinking about them at midnight, you'll always be able to see the tiniest of wriggles.

2-in-1 cot and wall mount

Our Baby Unit attaches securely to the cot or the wall with just one mount. We've designed it especially with safety in mind: keeping cables away and the Baby Unit firmly in place, all while ensuring that you get the best performance from our video-based sleep and breathing tracking.

Automated sleep diary

Our premium monitor automatically logs every sleep, generating insights and helping you better understand sleep states and wake windows. With historical sleep stats from the past 30 days visualised in handy graphs, you'll also be in the know about sleep regressions and other changes to your baby's sleep schedule.

Soothing songs and white noise

Comfort your little one with tranquil tracks, natural soothing sounds or white noise. From garden birdsong to classic lullabies and even your own voice recordings, our monitor has all the sounds you need to gently lull your baby into slumber.

Highlights

Room thermometer and nightlight

Our Baby Unit comes with a built-in nightlight and room thermometer to make sure that the room looks and feels just right. It's easy to control the nightlight with the Parent Unit or app. And if the room becomes too warm or cold, you'll receive personalised notifications.

True talk back

Use your voice to soothe your little one while listening to them at the same time. Our talk back feature makes it easy to comfort your baby without entering the room.

Up to 12 hours of battery time***

Our rechargeable Parent unit has up to 12 hours of runtime*** so keeping an eye on your little one can easily fit into your routine. Day and night.
